

**IRL - ERL model for  
framing DOL easily**

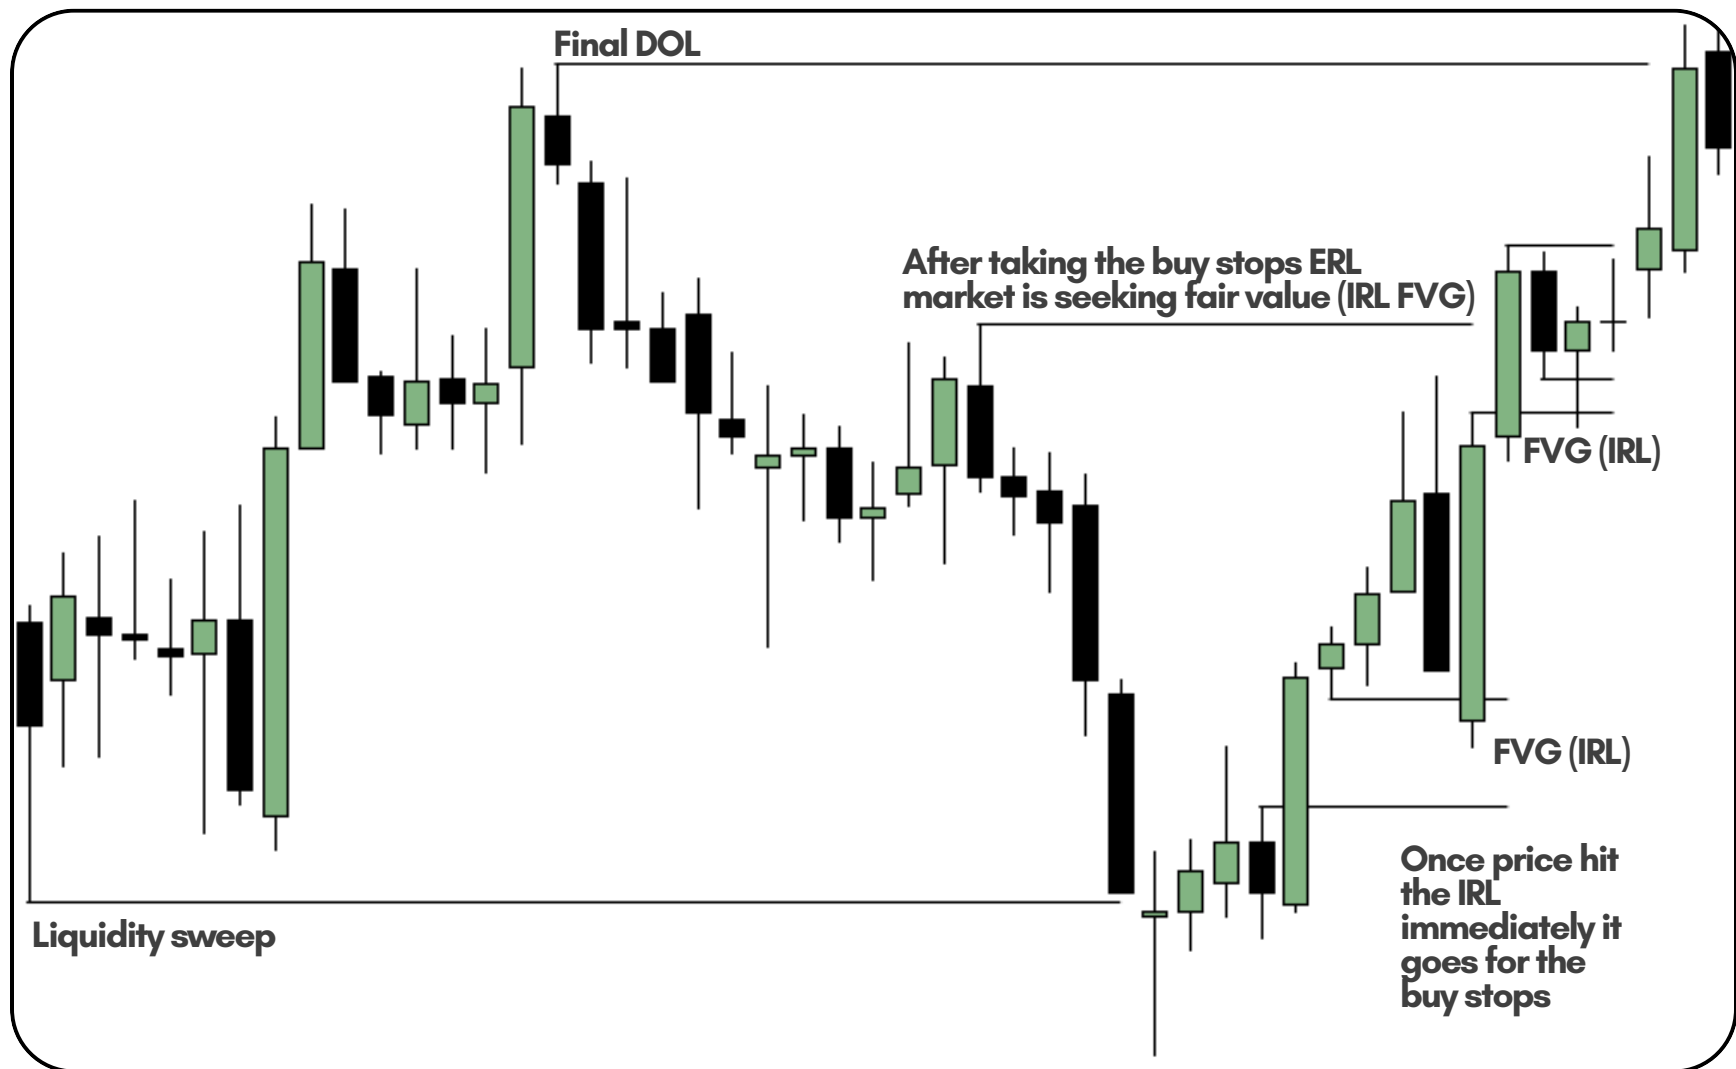

**@BLAZEMMXM**

## IRL - ERL model for framing DOL easily

Price does only two things:

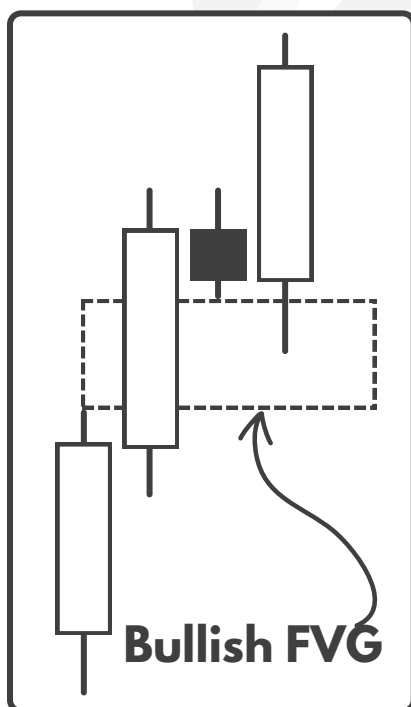

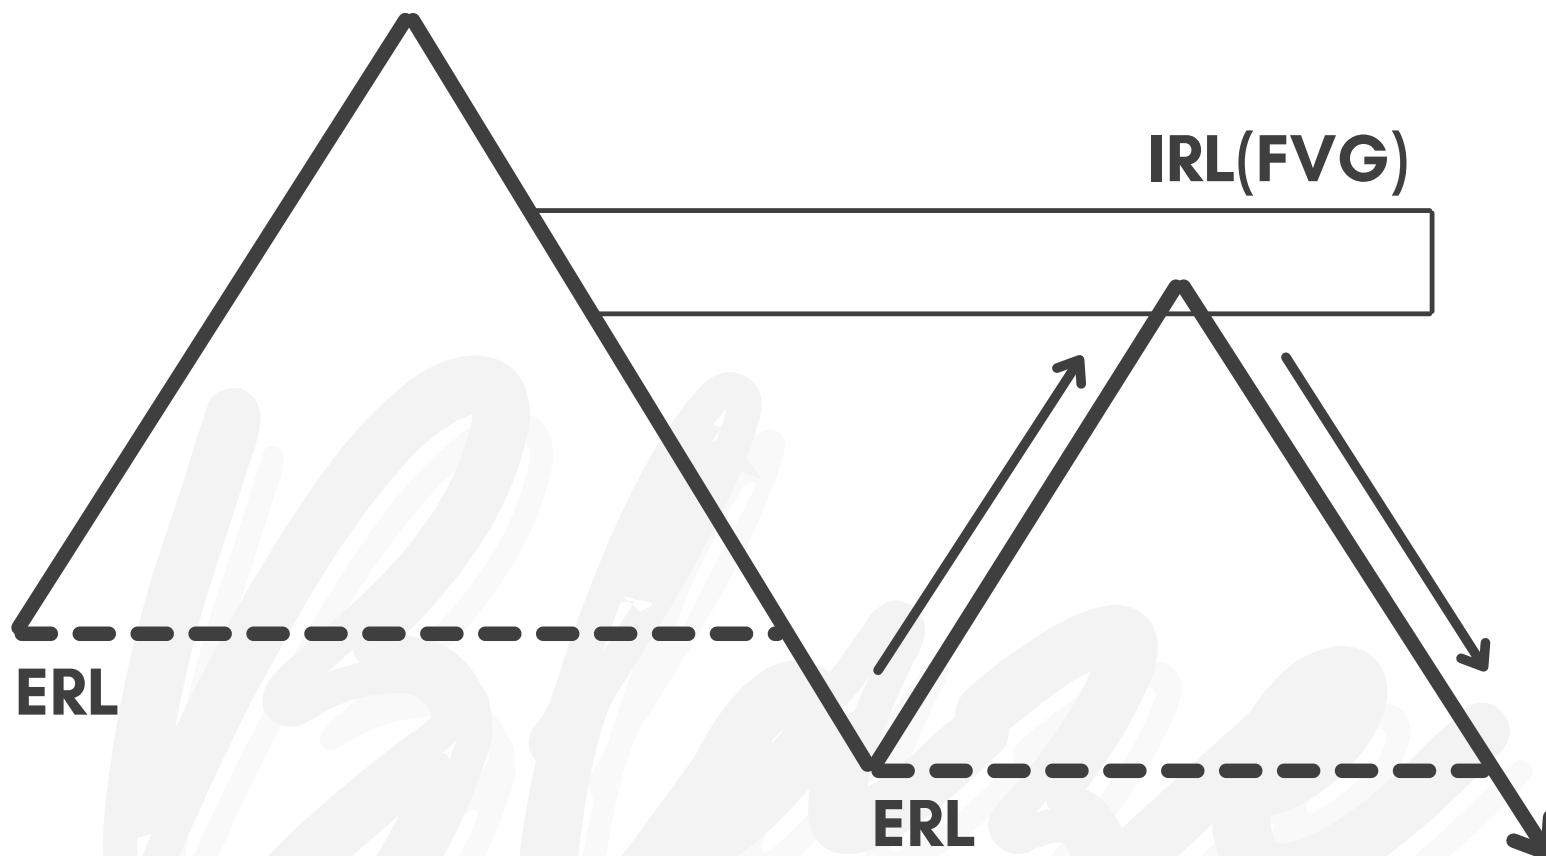

- Offer Fair Value
- Seek Liquidity

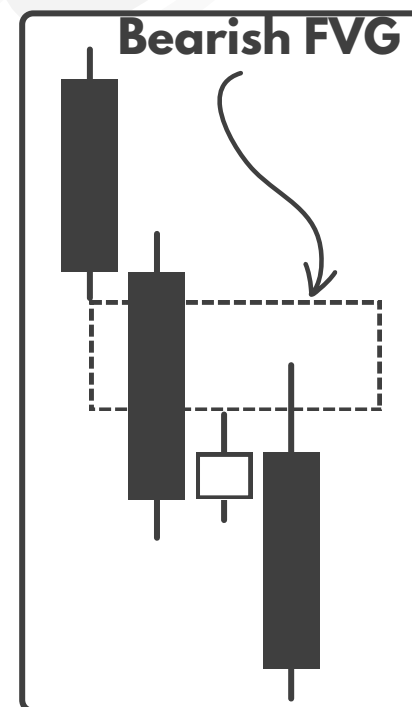

In the above image you can see how price reacts immediately from IRL and moves to ERL and ERL - IRL

**@BLAZEMMXM**

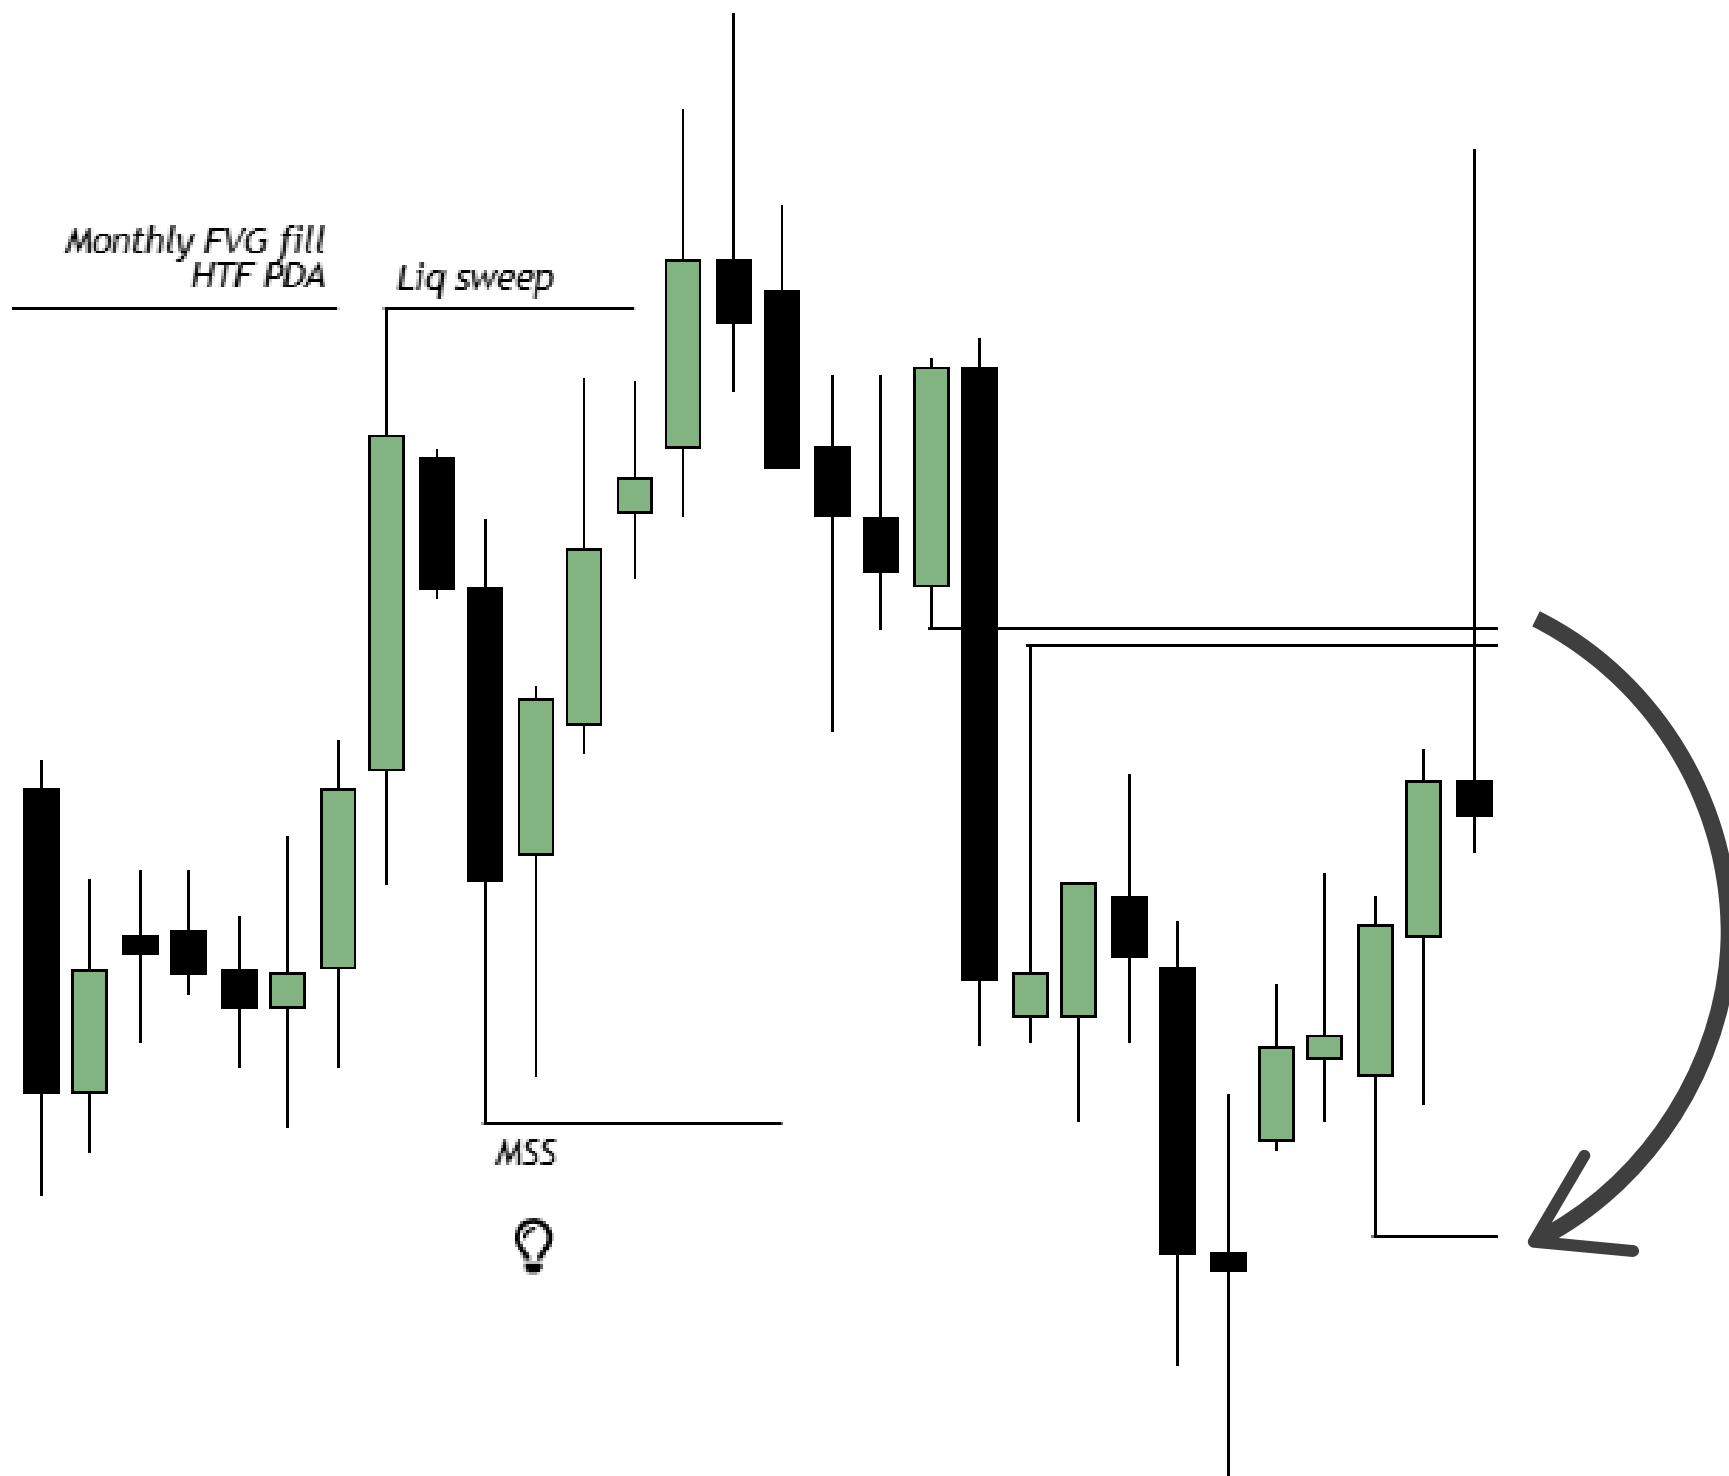

**Always remember price is doing only 2 things: Rebalance FVG and Seek Liquidity.**

**When external range liquidity is taken, a FVG becomes the next draw on liquidity.**

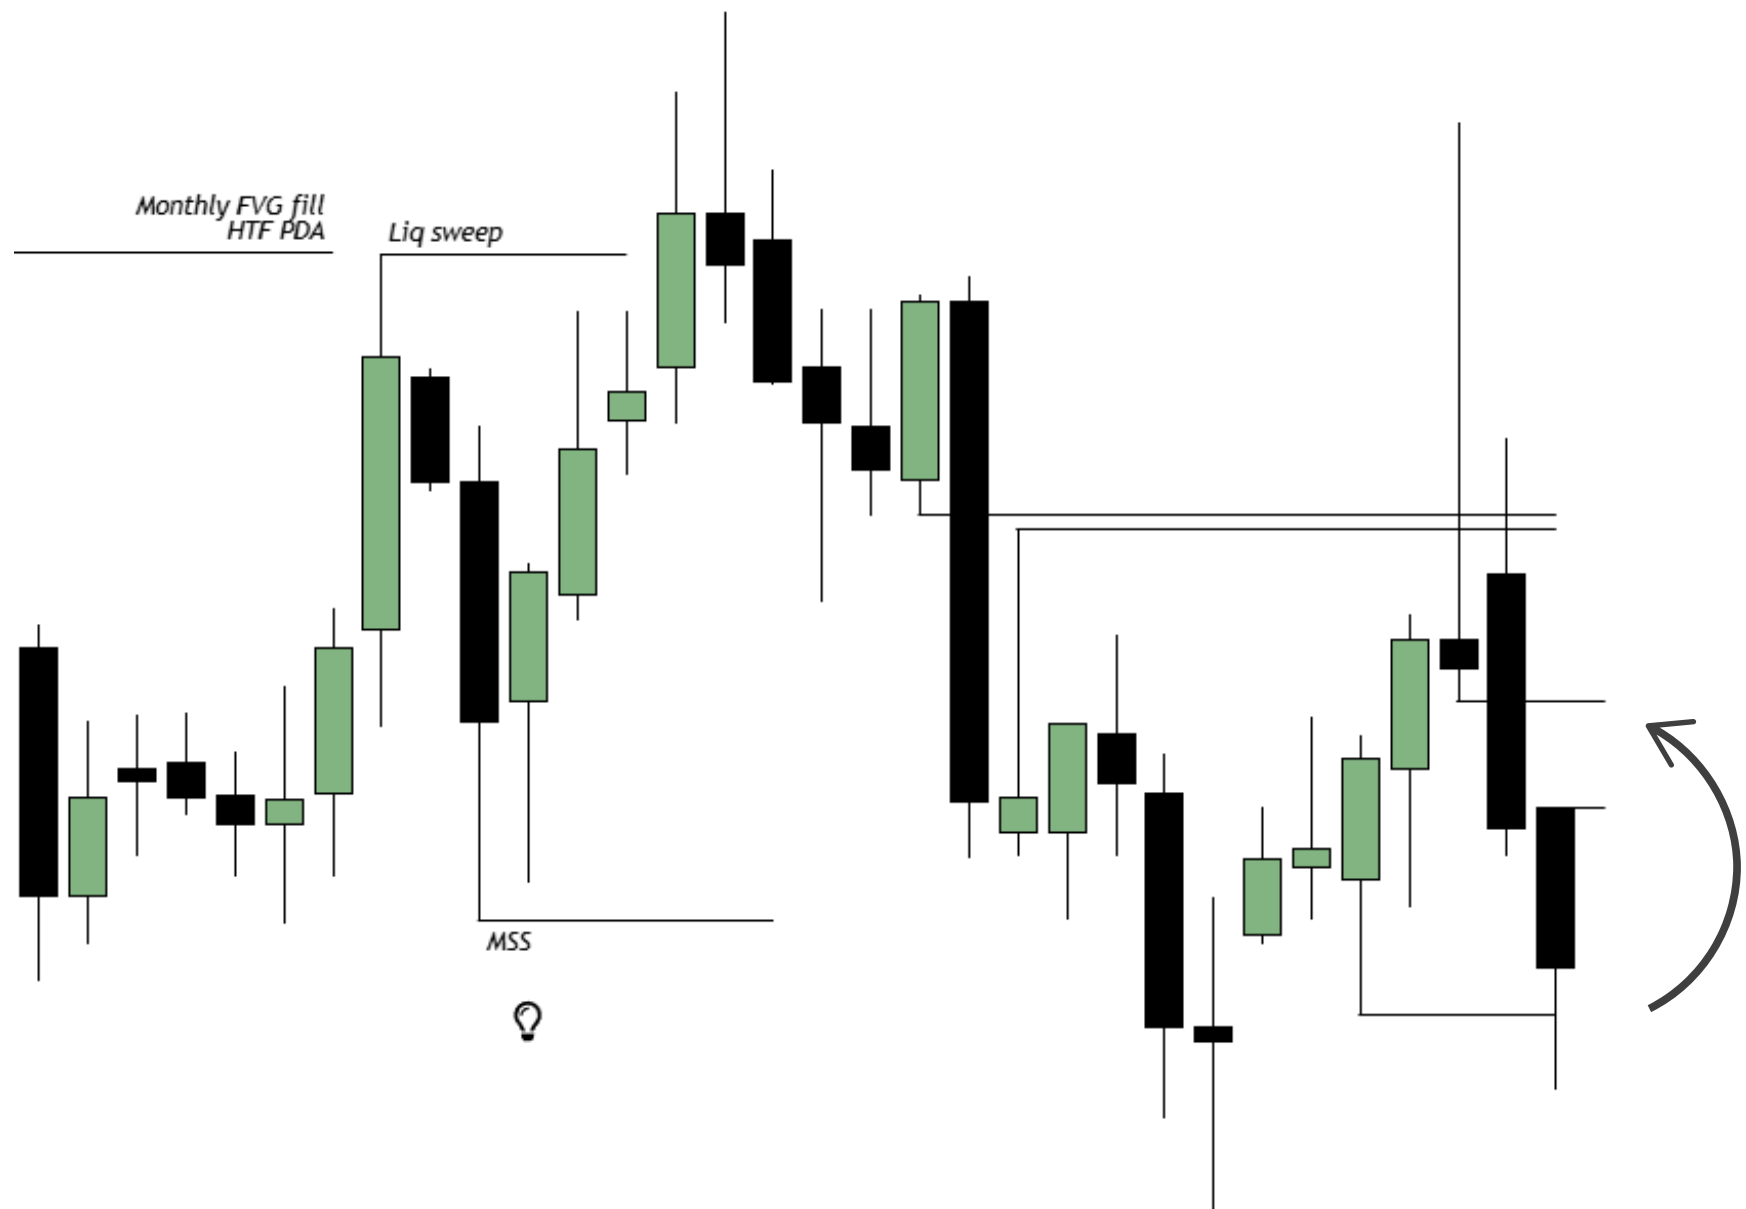

# Example: DXY recent daily chart

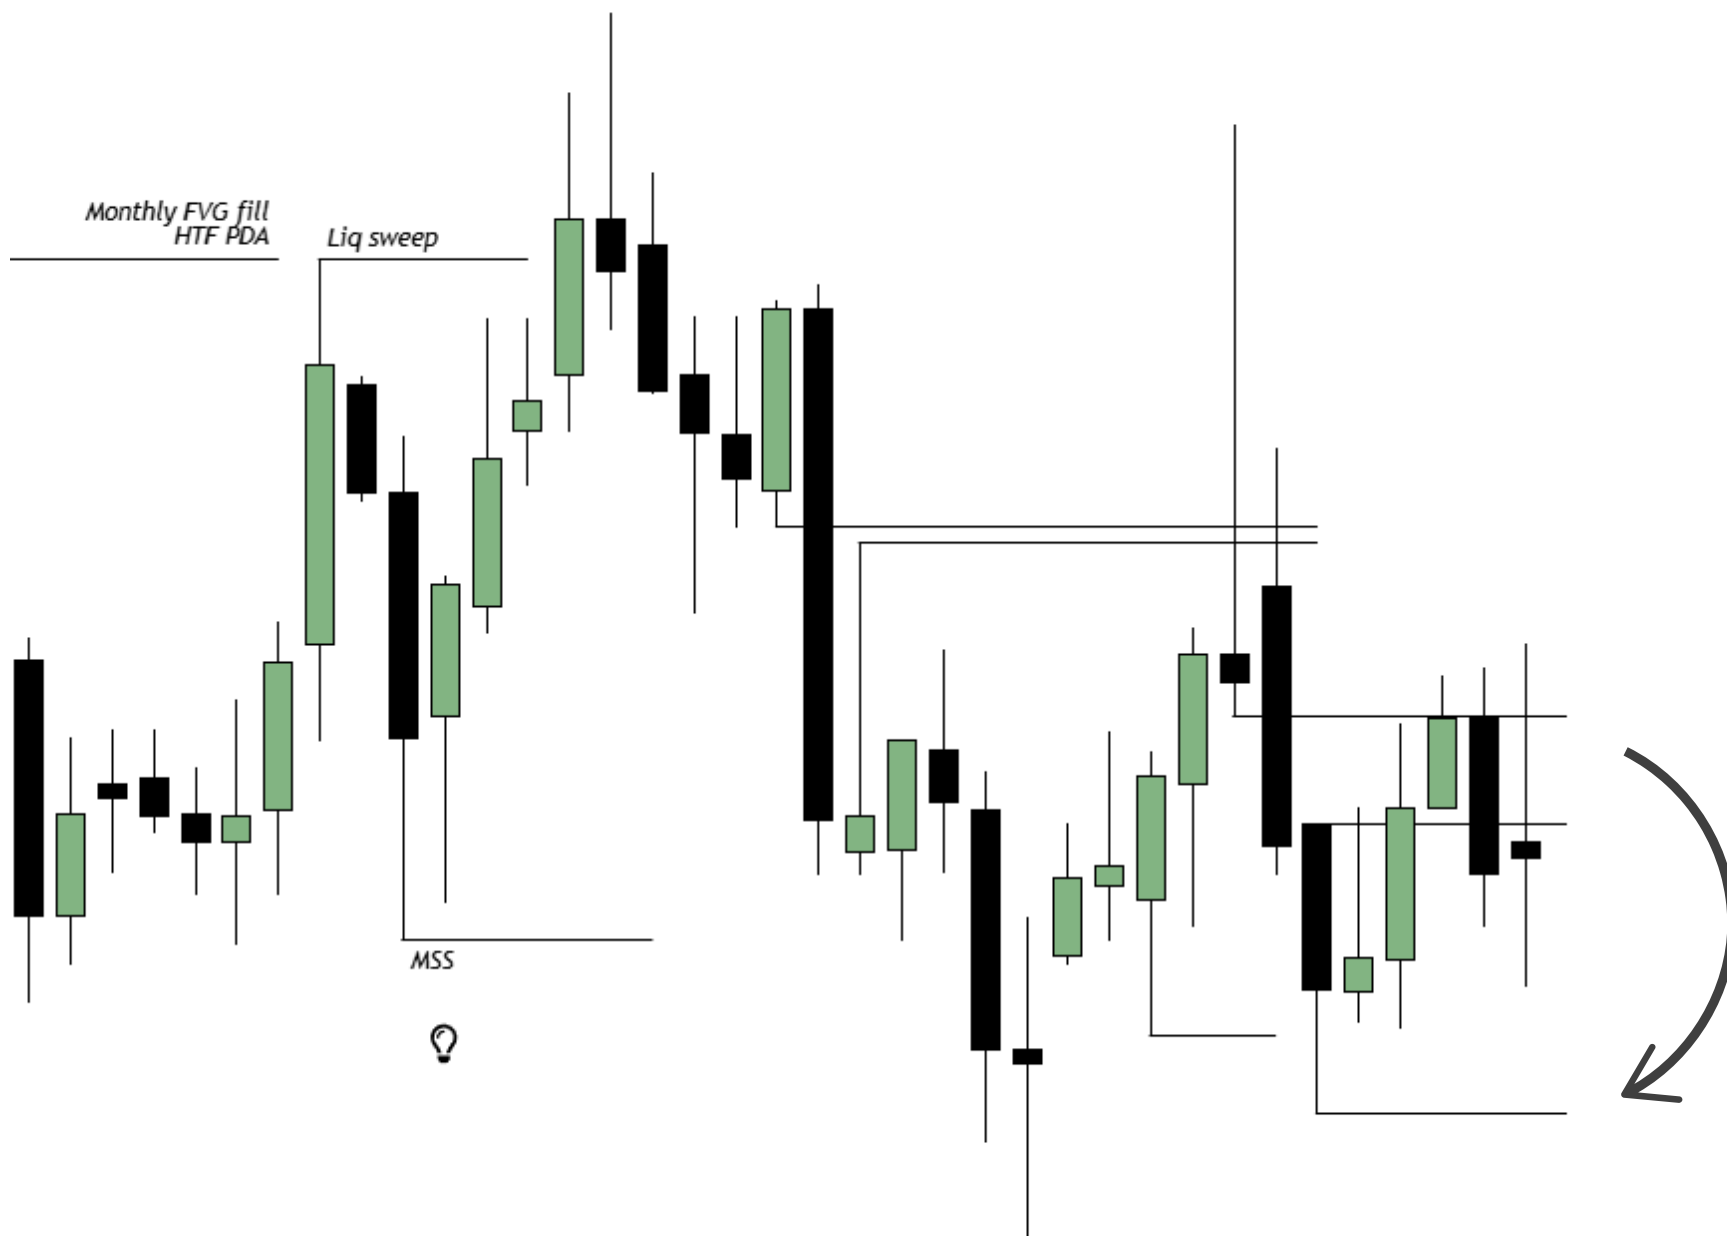

IRL - ERL

# Final Chart:

**@BLAZEMMXM**

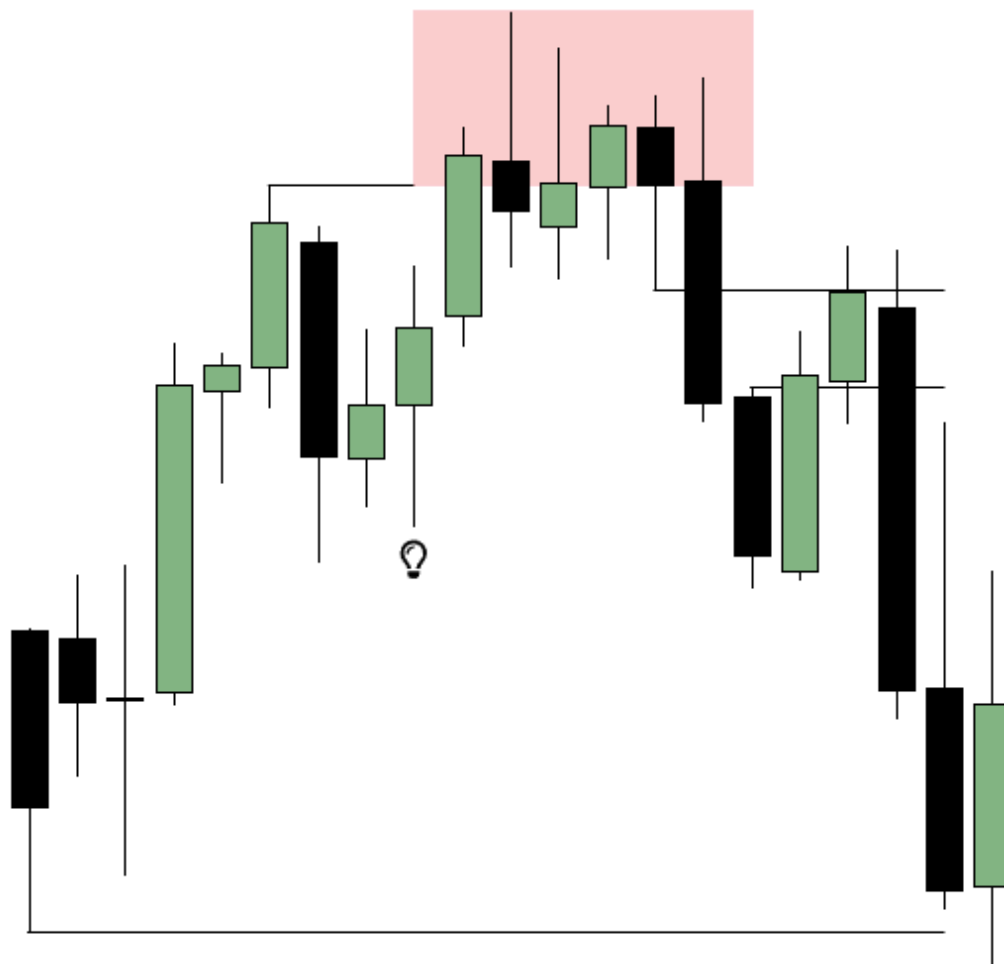

**Check DXY daily chart for better understanding**

**This is how I frame bias for the week**

**Using IRL - ERL you can capitalize the lower time frame *MMXM*'s easily**

**I'll make a thread on that too in upcoming day's**

**Just keep it simple.**
