

Timeframe Alignment Bullish + Bearish examples

Framework for determining how to be on the correct side of the curve.

BUILDING HTF NARRATIVE FOR THE MMXM

- HTF Key Level with SMT for SMR
- Look for HTF CSD and draw out new dealing range
- Look for setups in the re-accumulation phase, not in the SMR
- Using the 4H-1H-15m to frame a setup
- Entry on 15min

When building the HTF narrative;

We want to be looking for HTF Key level with SMT in DISCOUNT, before we can determine a high probability SMR.

BULLISH				LIVING OFF C H A R T S	
STEP 1 HTF Key Level		STEP 3 HTF Dealing Range		STEP 5 TH CISD	
	STEP 2		STEP 4 4H Raid Into Discount		STEP 6 15 Min Discount Entry
LIVING OFF CHARTS
