What is Quarterly Theory?

Key Points 🏆

- >> There are two elements in charts, price elements and time elements.
- >> Quarterly theory is a time element.

- Quarterly theory suggests that time can be divided into 4 quarters and each uarter serves a different purpose.
- >> It helps us identify the best times to take a trade and when this time knowledge is applied at HTF PD Arrays we get High Probability trades.
- >> All of the major Higher timeframe (HTF) PD arrays have been talked about previously.
 - OrderBlocks
 - Fair Value Gaps
 - Liquidity

Marking Quarters for Different Timeframes

Key Points 🏆

>> An yearly cycle consists of 4 quarters. (3 months each)

Q1 = Jan-Mar

Q3 = July-Sept

Q2 = April-June

Q4 = Oct-Dec

» A monthly cycle consists of 4 quarters. (1 week each)

Q1 = First Full WeekQ3 = 3rd Week

Q2 = 2nd Week

Q4 = 4th Week

>> A weekly cycle consists of 4 quarters. (1 day each)

Q1 = Monday

Q3 = Wednesday

Q2 = Tuesday

Q4 = Thursday

>> A daily cycle consists of 4 quarters. (6 hours each) (All Times are in EST or UTC-4)

(Asian Session)

Q1 = 6:00 P.M to 12:00 A.MQ3 = 6:00 A.M to 12:00 P.M (New York Session)

Q2 = 12:00 A.M to 6:00 A.M.Q4 = 12:00 P.M to 6:00 P.M (London Session) (Afternoon Session)

Marking Quarters for Different Timeframes

Key Points 🏆

- >> A session cycle consists of 4 quarters. (90 minutes each) (Asian Session)
- Q1 = 6:00 P.M to 7:30 P.M
- Q3 = 9:00 P.M to 10:30 P.M
- Q2 = 7:30 P.M to 9:00 P.MQ4 = 10:30 P.M to 12:00 A.M

(London Session)

- Q1 = 12:00 A.M to 1:30 A.MQ3 = 3:00 A.M to 4:30 A.M
- Q2 = 1:30 A.M to 3:00 A.M
- Q4 = 4:30 A.M to 6:00 A.M

(New York Session)

- Q1 = 6:00 A.M to 7:30 A.MQ3 = 9:00 A.M to 10:30 A.M
- Q2 = 7:30 A.M to 9:00 A.MQ4 = 10:30 A.M to 12:00 P.M

(Afternoon Session)

- Q1 = 12:00 P.M to 1:30 P.M
 Q3 = 3:00 P.M to 4:30 P.M
- Q2 = 1:30 P.M to 3:00 P.M
- Q4 = 4:30 P.M to 6:00 P.M

Marking Quarters for Different Timeframes

Key Points 💡

A 90 minutes cycle consists of 4 quarters. (22 minutes each) (these are also called macros)

First 90 minutes of Asian session:

Q1 = 6:00 P.M to 6:22 P.M

Q3 = 6:45 P.M to 7:08 P.M

Q2 = 6:23 P.M to 6:45 P.M

Q4 = 7:08 P.M to 7:30 P.M

Second 90 minutes of Asian session:

Q1 = 7:30 P.M to 7:52 P.M

Q3 = 8:15 P.M to 8:37 P.M

Q2 = 7:53 P.M to 8:15 P.M

Q4 = 8:37 P.M to 9:00 P.M

Third 90 minutes of Asian session:

Q1 = 9:00 P.M to 9:22 P.M

Q3 = 9:45 P.M to 10:08 P.M

Q2 = 9:23 P.M to 9:45 P.M

Q4 = 10:08 P.M to 10:30 P.M

Fourth 90 minutes of Asian session:

Q1 = 10:30 P.M to 10:52 P.M
 Q3 = 11:15 P.M to 11:37 P.M

Q2 = 10:53 P.M to 11:15 P.M

Q4 = 11:37 P.M to 12:00 A.M

You can mark macros like this for each session by dividing each session in 22 minutes quarters. NOBODY INVENTED THEM.

What is Judas Swing And True Open?

Key Points 💡

- Judas swing is basically a liquidity sweep/manipulation to shake out retail stops before market turns in the desired direction.
- >> Points were Judas swing is applicable:

(all these were discussed in detail in the liquidity video)

- Weekly Highs/Lows
- Structural Highs/Lows
- Equal Highs/Lows
- True Opens are areas revisited by price before giving the actual move.
- >> True Opens are defined by these times:
 - Yearly true Open = 1st Monday of April
 - Monthly true open = 2nd Monday of the month
 - Weekly True open = 6:00 PM EST every Monday
 - Daily True open = 12:00 P.M (Midnight) EST time.
 - NY Session True open = 7:30 A.M EST time.
 - Asian Session True open = 7:30 P.M EST time.
 - London Session True open = 1:30 A.M EST time.

Possible Price Paths for Quarterly Theory

Key Points 💡

- >> Two possible paths:
 - AMDX
 - XAMD

AMDX

- Q1 = Accumulation/Consolidation
- Q2 = Manipulation/Judas Swing
- Q3 = Distribution

Possible Price Paths for Quarterly Theory

XAMD

- Q1 = Continuation/Reversal of HTF PD Array
- Q2 = Accumulation/Consolidation
- Q3 = Manipulation/Judas Swing
- Q4 = Distribution

>> In either model a trade can be taken at the Judas Swing Region or when price teste the true open.

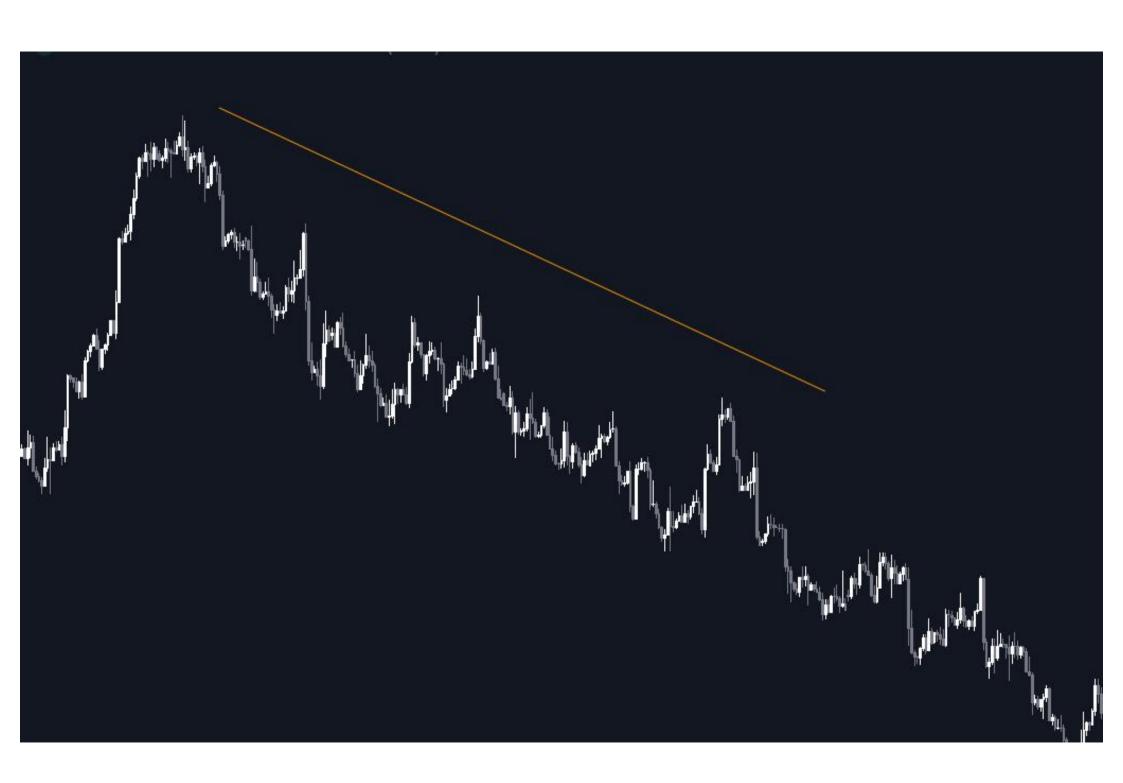

High Probability way of Trading Quarterly Theory

Checklist 🚏

- Align your trade with the Higher timeframe PD Array.
- 2 Wait for News to happen according to Econmic Calendar.
- 3 Use either the AMDX or XAMD Model.
